Subject Index

A

Abiotic stress, and hexokinase activity in *Echinochloa*, 1403
Abscisic acid
  broad bean guard cell response to, 1421
  and pH-regulated leaf expansion in droughted barley plants, 1507
Abscisic acid 8′-hydroxylase, as cytochrome P450 monooxygenase, in maize, 849
α-*N*-Acetylglucosaminidase gene, in tobacco, 1534
Acid-growth response, α-expansins and, in tobacco, 907
Actin, plasma membrane-associated, in tobacco, 917
S-Adenosylmethionine:methionine *S*-methyltransferase, in germinating barley, 431
Adenylate kinase, in Arabidopsis, 711
ADP-glucose pyrophosphorylase, in potato tubers, 265
Agrobacterium rhizogenes, natural genetic transformation by, Belgian endive and carrot annual flowering after, 543
Alfalfa
  root nodules of, infected cells of, *nms-32/34* gene and, 330
  taproot of, β-amylase in, 1495
Algae (*see also specific alga*)
  charophyte, Cl^- efflux in, pH and, 173
  fucoid, gamete release in, signal transduction during, 305
  red, photosystem II fluorescence quenching in, pH and, 103
Alkaloid synthesis, cytoplasmic pH and, in California poppy, 349
Allene oxide synthase transcripts, wound-induced accumulation of, aspirin/salicylic acid inhibition of, in flax leaves, 1057
Alternative oxidase
  in soybean cotyledons, 599
  stabilization of ubiquinone reduction by, in *Poa annua*, 599
Aluminum
  maize root cytoskeleton and, 159
  oxalate exudation by taro in response to, 861
Amino acid
  biosynthesis of, in poplar chloroplasts, 471
  metabolism of, in eucalypt ectomycorrhizia, 627
1-Aminocyclopropane-1-carboxylate synthase gene, in tobacco, 1534
Aminotransferase gene, in habañero pepper, 1102
Ammonium
  concentration of, in oilseed rape leaves, 1361
  generation of, in maize roots, 835
Amphipaths, partitioning of with drying, in *Typha latifolia* inflorescences, 975
β-Amylase, in alfalfa taproot, 1495
Anaerobiosis, in maize, enolase regulation during, 1285
Anionic peroxidases, of poplar xylem, 125
Anthers, of wheat, invertase cell wall gene in, 1535
Antirrhinum majus (*see* Snapdragon)
Apple, NADP sorbitol-6-phosphate dehydrogenase gene in, 1533
apx1 gene promoter, in Arabidopsis, heat-shock element in, 1005
Arabidopsis
  adenylate kinase in, 711
  apx1 gene promoter in, heat-shock element in, 1005
  AtSIG4 gene in, 1536
  auxin-dependent growth responses in, NPH4 in, 1265
  bacterial formamidopyrimidine-DNA glycosylase homolog genes in, 1535
  branched-chain α-keto acid dehydrogenase in, 329, 711
  camalexin biosynthesis in, 1389
  chloroplasts of, in vivo import in, transit sequence requirements for, 691
  conditional growth mutant of, sucrose and, 793
  cytochrome P450 genes of, systematic reverse genetics of, 743
  endoplasmic reticulum Ca^{2+}-pumping ATPase of, expression in yeast, 817
  GDP-mannose pyrophosphorylase in, 1101
  gibberellin overproduction phenotype in, 20-oxidase overexpression and, 773
  glucose glucosyltransferase homolog in, 1102
  histidine biosynthetic gene in, endoding of phosphoribosyl-ATP pyrophosphohydrolase and phosphoribosyl-AMP cyclohydrolase by, 275
  indoleacetic acid metabolism in, 285
  lipoic acid biosynthesis in, 935
  low-seed-oil mutant of, carbohydrate metabolism and, 91
  mammalian polypyrimidine tract-binding protein similarity to, 330
  metallothionein expression patterns in, 387
  nuclear gene expression in, plastid and phytochrome regulation of, 803
  Pex5p in, 330
  photolyase gene in, 1101
  PK3At in, 712
  pollen-specific Rho-GTPases in, 407
  proline dehydrogenase in, 1233
  pyruvate dehydrogenase kinase in, 1533
  roots of
    development of, auxin movement and, 1369
    growth behavior of, 1139
  seedlings of
    blue light-induced growth inhibition in, 609
    synergism between cytochrome 1 and phytochrome A and B in, 19, 27
  superoxide dismutase in, 637
  threonine dehydratase/deaminase gene in, 1534
  trypsin proteinase inhibitor effects on *Spodoptera littoralis* larvae in, 997
Arginine decarboxylase, in mustard, 330
Artichoke, herbicide metabolism in, CYP76B1 and, 1049
Ascorbate peroxidase, cytosolic, in barley, 329
Aspirin/salicylic acid, inhibition of wound-induced allene oxide synthase transcripts by, in flax leaves, 1057
ATPase, β subunits of, coding for in diploid tobacco mitochondria, 331
ATPase beta 3 isoform gene, in tobacco mitochondria, 711
atp2 gene family, in diploid tobacco, 331
AtSIG4 gene, in Arabidopsis, 1536
Auxin
  genetic promoters responsive to, 341
  growth responses dependent on, in Arabidopsis, NPH4 in, 1265
  movement of, Arabidopsis root development and, 1369
  repression of endo-1,4-β-glucanase gene, in strawberry, 1307
  tobacco leaf mesophyll growth and, 557
Avena sativa (*see* Oat)
Avicennia marina, nuclear gene from, homology to ribosomal animal and human gene, 1534
Avocado, flavanone 3-hydroxylase gene in, 1535

B

Bacterial formamidopyrimidine-DNA glycosylase genes, Arabidopsis homolog of, 1535
Barley
  cell walls of, nucellain in, 1169
  cytosolic ascorbate peroxidase in, 329
  germinating, *S*-adenosylmethionine:methionine *S*-methyltransferase in, 431
  leaves of
    carbohydrates in, with changed export or photosynthetic rate, 1525
    mitochondrial protein biogenesis in, 1089
    photosynthetic acclimation of, 227
    pH-regulated expansion of in droughted plants, abscisic acid and, 1507
  plastid genes of, trnI-GAU and trnA-UGC interruption in, 331
  roots of
    effects of potassium and pH on growth of, 957
    HKT1 regulation in, 651
  starch-branching enzyme IIa and IIb genes in, 37
Bean (*see also* Broad bean; Soybean)
  chloroplasts of, nocturnal carbon export from, 1439
  oxidative stress in, light and excess manganese in, 493
Beet, plasma membrane of, intrinsic protein subgroups in, 315
Belgian endive, annual flowering in, natural genetic transformation by *Agrobacterium rhizogenes* and, 543

Benzophenanthridine alkaloid synthesis, cytoplasmic pH and, in California poppy, 349
Benzothiadiazole, resistance to *Fusarium oxysporum* mediated by, in tomato, 1203
Berries, of grape, cell walls during ripening of, 783
Beta vulgaris (*see* Red beet)
Blue light, growth inhibition induced by, in Arabidopsis seedlings, 609
Boron, requirement for, in *Chenopodium album*, 1103
Branched-chain α-keto acid dehydrogenase, in Arabidopsis, 329, 711
Brassica campestris, mitochondrial *atpA* gene in, 1102
Brassica napus (*see* Oilseed rape)
Brassica rapa, embryos of, erucic acid biosynthesis in, 183
Broad bean, guard cells of, responses of to abscisic acid and calcium, 1421

C

C_3-C_4 intermediate phenotype, in *Moricandia arvensis*, 1277
C_4 phospho*enol*pyruvate carboxylase kinase, light activation of, in maize *bundle sheath defective2-mutable1* mutant, 191
Cabbage, phopholipase D isoenzymes in, 1102
Caffeic acid 3-*O*-methyltransferase gene, in habañero pepper, 711
Calcium
  broad bean guard cell response to, 1421
  influx of, and *Egeria densa* leaf respiratory burst and electrolyte leakage, 1379
  mineral toxicity alleviation by, in wheat, 513
  transport of, across pea chloroplast inner envelope vesicles, 1447
Calcium channel blocker, and gravitropic response of snapdragon spikes, 483
Calcium signal, anoxic, mitochondrial contribution to, in maize, 759
Calcium-pumping ATPase, of Arabidopsis endoplasmic reticulum, expression of in yeast, 817
California poppy, alkaloid synthesis in, cytoplasmic pH and, 349
Callose deposition, apoplastic endosperm envelope semipermeability, in muskmelon seeds, 83
Calmodulin, ophiobolin A-resistant, 965
Camalexin biosynthesis, in Arabidopsis, 1389
Cambium, of poplar, phosphoglucomutase gene in, 1535
Carbamylation, Rubisco regulation by, in tobacco, 1463
Carbohydrates
  in barley leaves, with changed export or photosynthetic rate, 1525
  metabolism of
    in eucalypt ectomycorrhizia, 627
    regulation by low-seed-oil Arabidopsis mutant, 91
Carbon, nocturnal export of, from bean and tomato chloroplasts, 1439
Carbon dioxide
  photosynthetic acclimation to (*see* Photosynthetic acclimation)
  Rubisco expression and, in rice leaves, 521
Carbon dioxide transfer resistance, in zinc-deficient rice leaves, 929
Carbonic anhydrase activity, in zinc-deficient rice leaves, 929
2-Carboxyarabinitol 1-phosphate, Rubisco regulation by, in tobacco, 1463
Carotenoid-associated protein CHRC gene, in cucumber, 1536
Carrot
  annual flowering in, natural genetic transformation by *Agrobacterium rhizogenes* and, 543
  late-embryonic abundant gene of, in transgenic tobacco seedlings, 1181
  taproot of, sucrose/H^+ symporters from, 1473
Catharanthus roseus, serine/threonine phosphatases in, 1533
Cattail
  inflorescence of, partitioning of amphipaths with drying in, 975
  pollen of, cytoplasmic viscosity and desiccation tolerance in, 1253
  seeds of, intracellular glasses in, molecular mobility and, 531
Celery, mannitol dehydrogenase in, 329
Cell walls
  of barley, nucellain in, 1169
  of *Chenopodium album*, boron requirement and, 1103
  expansin loosening of, 333
  during grape berry ripening, 783
  after water stress reversal, in maize leaves, 701
Cellulose synthase, in poplar xylem, 1101
Chara corallina (*see* Charophyte algae)
Charophyte algae, Cl^- efflux in, pH and, 173
Chenopodium album, boron requirement and cell wall properties of, 1103
Cherry, fruit of, phenylalanine ammonia-lyase in, 1102
Chickpea, ribosome-associated p40 protein in, 330
Chilling, sucrose phosphate synthase and nitrate reductase activity and, in tomato, 149
Chitosans and chitooligosaccharides, in wheat leaf resistance reactions, 1353
Chlamydomonas reinhardtii, NAD-isocitrate dehydrogenase in, 249
Chloride efflux, pH and, in charophyte algae, 173
Chloromonas, Rubisco large subunit gene in, 1534
Chlorophyll *a/b* proteins
  in photosynthetic acclimation, of barley leaves, 227
  in spinach, acclimative degradation of, 827
Chlorophyll synthesis, in dark-grown pine needles, 1159
Chloroplast(s)
  of Arabidopsis, in vivo import in, transit sequence requirements for, 691
  of bean, nocturnal carbon export from, 1439
  of pea, calcium transport across, 1447
  of poplar, glutathione and amino acid biosynthesis in, 471
  of potato, tetrapyrrole biosynthesis in, 330
  of *Scherffelia dubia*, frucose-1,6-bisphosphate aldolase gene in, 1533
  of tomato, nocturnal carbon export from, 1439
  of wheat, *psbD* light-responsive promoter in, circadian-regulated transcription of, 1079
Chloroplast DHA helicase II, in pea, fork-like replication structure preference of, 1029
CHRC protein, carotenoid-associated, cucumber gene encoding, 1536
Cicer arietinum, histone H2A gene in, 1536
Cichorium intybus (*see* Belgian endive)
Cinnamate 4-hydroxylase, piperonylic acid inhibition of, 209
Citrus, ethylene receptor ERS homolog gene in, 1534
Coconut, embryo development in, protein phosphorylation during, 257
Cocos nucifera (*see* Coconut)
Cold-responsive genes, plant freezing tolerance and, 1
Colocasia esculenta (*see* Taro)
Corn (*see* Maize)
Corydalis sempervirens, 12-oxophytodienoate-10,11-reductase in, 1345
Cotton, fiberless seed mutation in, sucrose synthase expression and, 399
Cotyledons
  of cowpea, cytoplasmic viscosity and desiccation tolerance in, 1253
  of soybean, alternative oxidase expression in, 675
Cowpea, cotyledons of, cytoplasmic viscosity and desiccation tolerance in, 1253
Cucumber, carotenoid-associated protein CHRC gene in, 1536
Cucumis melo (*see* Muskmelon)
Cucurbita maxima (*see* Pumpkin)
Cyclins, mitotic, of yellow lupin, 330
Cyclopiazonic acid, inhibition of Arabidopsis endoplasmic reticulum Ca^{2+}-pumping ATPase expression by, 817
CYP76B1, herbicide metabolism and, in Jerusalem artichoke, 1049
CYP94A1 accumulation, methyl jasmonate and, in *Vicia sativa* seedlings, 1481
Cytochrome P450 genes, of Arabidopsis, systematic reverse genetics of, 743
Cytochrome P450 monooxygenase, abscisic acid 8′-hydroxylase as, in maize, 849
Cytochrome 1, phytochrome A and B synergism with, in Arabidopsis, 19, 27

D

Daucus carota (*see* Carrot)
Deepwater rice, stem elongation in, 1105
Defensin gene, in drought-induced soybean, 1536
Desiccation tolerance, cytoplasmic viscosity and, in cowpea cotyledons and pollen of *Typha latifolia* and impatiens, 1253
2,4-Dichlorophenoxyacetic acid, tomato fruit ornithine decarboxylase and, 323
Drought

barley plants in, pH-regulated leaf expansion in, abscisic acid and, 1507
soybean plants in, defensin gene in, 1536
Durum wheat, seedlings of, zinc uptake, binding, and translocation in, 219

E

Echinochloa, hexokinase activity in, abiotic stress and, 1403
Ectomycorrhizia, eucalypt, carbohydrate and amino acid metabolism in, 627
Egeria densa, leaves of, respiratory burst and electrolyte leakage in, 1379
Electrical potential, of wheat cell membrane surface, 505
Electrolyte leakage, in *Egeria densa* leaves, 1379
Electronic plant gene register, 329, 711, 1101, 1533
Elicitins, in tobacco cells, 1317
Embryos
of *Brassica rapa*, erucic acid biosynthesis in, 183
of coconut, protein phosphorylation during development of, 257
of pea, starch-debranching enzymes in, 581
Endive, Belgian, annual flowering in, natural genetic transformation by *Agrobacterium rhizogenes* and, 543
Endo-1,4-β-glucanase gene, in strawberry, 1307
Endoplasmic reticulum, of Arabidopsis, Ca^{2+}-pumping ATPase of, expression in yeast, 817
Endosperm envelope, of muskmelon seeds, apoplastic semipermeability of, callose deposition and, 83
Enolase, regulation of, during maize anaerobiosis, 1285
Eruic acid, biosynthesis of, in *Brassica rapa* embryos, 183
Eschscholtzia californica (*see* California poppy)
Ethylene
biosynthesis of, feedback regulation of, in tomato fruit, 1295
potato microtuber dormancy and, 843
Ethylene defense responses, in tobacco, nitrilase-like proteins and, 867
Ethylene receptor ERS homolog gene, in citrus, 1534
Eucalyptus
ectomycorrhizia and, carbohydrate and amino acid metabolism in, 627
flowers of, MADS-box genes in, 365
Expansin, cell wall loosening by, 333

F

Farnesyltransferase, subunit A of, nucleotide sequence of, 329
Ferredoxin isoproteins, in tomato fruit plastids, 439
Ferrochelatase, in tetrapyrrole biosynthesis, in potato, 330
FK506-binding proteins, in wheat germ lysate, 1395
Flavanone 3-hydroxylase gene, in avocado, 1535
Flax, leaves of, wound-induced allene oxide synthase transcripts in, aspirin/salicylic acid inhibition of, 1057
Flowering, annual, in Belgian endive and carrot, natural genetic transformation by *Agrobacterium rhizogenes* and, 543
Flowers, of eucalyptus, MADS-box genes in, 365
Formamidopyrimidine-DNA glycosylase gene, Arabidopsis homolog of, 1535
14–3–3 protein
H^+-ATPase phosphothreonine protection by, 551
nitrate reductase binding to, 1041
Fragaria (*see* Strawberry)
FRE gene, from yeast, in transgenic tobacco, 51
Freezing tolerance, cold-responsive genes and, 1
Frucose-1,6-bisphosphate aldolase gene, in *Scherffelia dubia* chloroplasts, 1533
Fruit
of cherry, phenylalanine ammonia-lyase in, 1102
of nasturtium, xyloglucan:fucosyltransferase in, 885
of tomato
ethylene biosynthesis in, feedback regulation of, 1295
ferredoxin isoprotein colocalization in, 439
ornithine decarboxylase in, 323
Fusarium oxysporum, benzothiadiazole-mediated resistance to, in tomato, 1203

G

β-Galactosidase cDNA, in papaya, 1102
Gamete release, in *Pelvetia compressa*, signal transduction during, 305
GDP-mannose pyrophosphorylase, in Arabidopsis, 1101
Gene transfer, from organelles to nucleus, 9
Genomics, 713, 725
Germin-like protein, in potato, 711
Gibberellic acid, tomato fruit ornithine decarboxylase and, 323
Gibberellin biosynthesis
in lettuce seeds, phytochrome and, 1517
in pumpkin, 1411
Gibberellin $^3\beta$-hydroxylase gene, in tomato seedlings, 1534
Gibberellin-overproduction phenotype, in Arabidopsis, 20-oxidase overexpression and, 773
β-1,3-Glucan, thaumatin-like protein binding to, 1431
Glucan endo-1,3-β-glucosidase, in potato, 712
Glucose glucosyltransferase homolog, in Arabidopsis, 1102
Glutathione biosynthesis, in poplar chloroplasts, 471
Glutathione peroxidase, in *Zantedeschia aethiopica*, 1102
Glutathione *S*-transferase, in rice, 329
Glutenin subunit gene, in wheat, 1147
Glycine max (*see* Soybean)
Glycosylphosphatidylinositol-anchored phosphatase, from *Spirodela oligorrhiza*, 1015
Glyoxysomal malate dehydrogenase, in rice, 331
Gossypium hirsutum (*see* Cotton)
Granule-bound starch synthase, in wheat pericarp, 451
Grape, berries of, cell walls during ripening of, 783
Gravitropic response, of snapdragon spikes, lanthanum chloride and, 483
Growth inhibition, blue light-induced, in Arabidopsis seedlings, 609
Guard cells, of broad bean, responses of to abscisic acid and calcium, 1421
Gymnosperms, of pine, $NADP^+$-isocitrate dehydrogenase in, 617

H

H^+-ATPase
in plasma membrane of spinach, phosphothreonine residue protection of, 551
vacuole-type, assembly of, in oat seeds, 137
Habañero pepper
aminotransferase gene in, 1102
caffeic acid 3-*O*-methyltransferase gene in, 711
3-ketoacyl-ACP synthase gene in, 1102
Heat-shock element, in Arabidopsis apx1 gene promoter, 1005
Heat-shock protein genes, in rice, 1101
Helianthus tuberosus (*see* Jerusalem artichoke)
Hemoglobins, 1121
Herbicides
metabolism of, CYP76B1 and, in Jerusalem artichoke, 1049
protoporphyrinogen oxidase-inhibiting, tobacco cellular resistance to, 751
Hexokinase activity, in *Echinochloa*, abiotic stress and, 1403
Hexose transport, in petunia pollen tubes, 297
Histidine biosynthesis, in Arabidopsis, encoding of phosphoribosyl-AMP cyclohydrolase and phosphoribosyl-ATP pyrophosphohydrolase by, 275
Histone H2A gene, in *Cicer arietinum*, 1536
HKT1, regulation of, in barley and wheat roots, 651
Hordeum vulgare (*see* Barley)
Hyacinth, metallothionein-like protein in, 1101
Hypersensitive reaction, peroxide and, in lettuce, 1067

I

Impatiens balsamina, inflorescence formation in, 1191
Impatiens glandulifera, pollen of, cytoplasmic viscosity and desiccation tolerance in, 1253
Indoleacetic acid metabolism, in Arabidopsis, 285
Inflorescences
of cattail, partitioning of amphipaths with drying in, 975
formation of, in *Impatiens balsamina*, 1191
Intracellular glasses, in seeds of pea and cattail, water content and temperature effects on, 531

Invertase cell wall gene, in wheat anthers, 1535
Isochorismate synthase, 1536
Isoflavonoid phytoalexin, accumulation of, in soybean, serine protease inhibitors and, 1487

J

Jerusalem artichoke, herbicide metabolism in, cytochrome P450 CYP76B1 and, 1049

K

α-Keto acid dehydrogenase, branched-chain, in Arabidopsis, 329, 711
3-Ketoacyl-ACP synthase gene, in habañero pepper, 1102

L

Lanthanum chloride, and gravitropic response of snapdragon spikes, 483
Late-embryonic abundant gene, of carrot, in transgenic tobacco seedlings, 1181
Latuca sativa (*see* Lettuce)
Leaves
  of barley
    carbohydrates in, with changed export or photosynthetic rate, 1525
    mitochondrial protein biogenesis in, 1089
    pH-regulated expansion of in droughted plants, abscisic acid and, 1507
    photosynthetic acclimation of, 227
  of *Egeria densa*, respiratory burst and electrolyte leakage in, 1379
  of flax, wound-induced allene oxide synthase transcripts in, aspirin/salicylic acid inhibition of, 1057
  of maize, after water stress reversal, acid pH and cell wall adjustment and, 701
  of oilseed rape
    apoplastic ammonium concentration in, 1361
    sulfur distribution in, 1337
  of pea, senescence of, ascorbate-glutathione cycle in, 1327
  of rice
    Rubisco expression in, CO_2 growth and, 521
    zinc deficiency in, carbonic anhydrase activity and CO_2 transfer resistance in, 929
  of tobacco
    plasmodesmata in, regulation of protein trafficking via, 373
    sucrose transport in, 59
  of wheat
    excess Rubisco investment in, 945
    resistance reactions in, chitosans and chitooligosaccharides in, 1353
LeMir gene, in tomato roots, 237
Lettuce
  hypersensitive reaction in, peroxide and, 1067
  seeds of, gibberellin biosynthesis in, phytochrome and, 1517
Leucine catabolic pathway, of soybean seeds, 3-methylcrotonyl-coenzyme A carboxylase in, 1127
Light
  activation of C_4 phospho*enol*pyruvate carboxylase kinase by, in maize *bundle sheath defective2-mutable1* mutant, 191
  intensity of, manganese toxicity and, in bean oxidative stress, 493
Light-harvesting chlorophyll *a/b* protein, in spinach, acclimative degradation of, 827
Light-induced stress proteins, in photosynthetic acclimation, of barley leaves, 227
Lilium longiflorum, PR-10 protein gene in, 1535
α-Linolenic acid, overexpression of, in transgenic tobacco, 591
Linum usitatissimum (*see* Flax)
Lipoic acid biosynthesis, in Arabidopsis, 935
Lolium perenne (*see* Ryegrass)
Lupin, yellow, mitotic cyclins of, 330
Lycopersicon esculentum (*see* Tomato)

M

MADS box genes
  in eucalypt flowers, 365
  in wheat, 330
Maize
  abscisic acid 8′-hydroxylase as cytochrome P450 monooxygenase in, 849
  anaerobiosis in, enolase regulation during, 1285
  bundle sheath defective2-mutable1 mutant of, light activation of C_4 phospho*enol*pyruvate carboxylase kinase in, 191
  egg cells of, ubiquitin-carrier protein in, 1101
  leaves of, after water stress reversal, acid pH and cell wall adjustment and, 701
  mitochondria of, contribution to anoxic Ca^{2+} signal in, 759
  nucleoredoxin in, 987
  poly(ADP)-ribose polymerase in, 895
  roots of
    ammonium generation in, 835
    cytoskeleton of, aluminum and, 159
  Rubisco activase gene in, 1535
Manganese, toxicity of, light intensity and, in bean oxidative stress, 493
Manganese superoxide dismutase, 712
Mannitol dehydrogenase in celery, 329
Medicago sativa (*see* Alfalfa)
Mesophyll
  of tobacco, auxin-induced growth of, 557
  of zinnia, tracheary element differentiation in, proteasome inhibitors and, 419
Metallothionein, expression patterns of, in Arabidopsis, 387
Metallothionein-like protein, in water hyacinth, 1101
24-Methyl to 24-ethyl sterol ratio, tobacco growth and, 461
Methyl jasmonate, effects on *Vicia sativa* seedlings, 1481
3-Methylcrotonyl-coenzyme A carboxylase, in leucine catabolic pathway, of soybean seeds, 1127
Mineral toxicity (*see also specific mineral*)
  calcium alleviation of, in wheat, 513
Mitochondria
  of *Brassica campestris*, *atpA* gene in, 1102
  of maize, contribution to anoxic Ca^{2+} signal in, 759
  of potato, tetrapyrrole biosynthesis in, 330
  of tobacco, ATPase beta 3 isoform gene in, 711
Mitochondrial protein biogenesis, in barley leaves, 1089
Mitosis, suppression of, in pea root cap, 1223
Mitotic cyclins, of yellow lupin, 330
Molecular mobility, water content and temperature effects on, in seeds of pea and cattail, 531
Monosaccharide transport, in petunia pollen tubes, 297
Moricandia arvensis, C_3-C_4 intermediate phenotype in, 1277
Muskmelon, seeds of, callose and apoplastic semipermeability in, 83
Mustard
  arginine decarboxylase in, 330
  seedlings of, thermotolerance in, salicylic acid and antioxidants in, 1455

N

NAD-isocitrate dehydrogenase, in *Chlamydomonas reinhardtii*, 249
NADP sorbitol-6-phosphate dehydrogenase gene, in apple, 1533
$NADP^+$-isocitrate dehydrogenase, in pine gymnosperms, 617
Nasturtium, fruit of, xyloglucan:fucosyltransferase in, 885
Needles, dark-grown, of pine, chlorophyll synthesis in, 1159
Nicotiana (*see* Tobacco)
Nitrate reductase
  14–3–3 protein binding to, 1041
  in tomato, chilling and, 149
Nitrilase-like proteins, GCC box DNA-binding protein interaction with, in tobacco, 867
Nitrogen supply, photosynthetic acclimation and, in wheat, 573
nms-32/34 gene, and infected cells of alfalfa root nodules, 330
Nodule-specific glutamine synthetase gene, in soybean, 1533
NPH4, in auxin-dependent growth responses, in Arabidopsis, 1265
Nucleoredoxin, in maize, 987
Nucleus, gene transfer to, from organelles, 9

O

Oat, seeds of, assembly of vacuole-type H^+-ATPase in, 137
Oil, of Arabidopsis mutant seed, carbohydrate metabolism and, 91
Oilseed rape
  leaves of
    apoplastic ammonium concentration in, 1361

sulfur distribution in, 1337
ribosome-associated p40 protein in, 1536
Ophiobolin A, calmodulin resistance to, 965
Opium poppy, tyrosine/dihydroxyphenylalanine decarboxylase promoters from, in transgenic tobacco, 69
Organelles, gene transfer from, to nucleus, 9
Ornithine decarboxylase, in tomato fruit, 323
Oryza sativa (*see* Rice)
Oxalate exudation, by taro, in response to aluminum, 861
Oxidase (*see also* Alternative oxidase)
20-Oxidase, overexpression of, and gibberellin-overproduction phenotype in Arabidopsis, 773
Oxidative burst, in soybean, serine protease inhibitors and, 1487
Oxidative stress, in bean, light and excess manganese in, 493
12-Oxophytodienoate-10,11-reductase, in *Corydalis sempervirens*, 1345
Ozone sensitivity, in poplar, 1233

P

P450 (*see* Cytochrome P450)
p40 protein, ribosome-associated, in chickpea, 330
Papaver somniferum (*see* Opium poppy)
Papaya, β-galactosidase cDNA in, 1102
Pea
chloroplast DNA helicase II from, fork-like replication structure preference of, 1029
chloroplast inner envelope vesicles of, calcium transport across, 1447
embryos of, starch-debranching enzymes in, 581
leaves of, senescence of, ascorbate-glutathione cycle in, 1327
PsPK3 protein kinase in, Arabidopsis homolog of, 712
root cap of, mitosis suppression in, 1223
seeds of, intracellular glasses in, molecular mobility and, 531
Pelvetia compressa, gamete release in, signal transduction during, 305
Pepper (*see* Habañero pepper)
Pericarp, of wheat, granule-bound starch synthase isoform in, 451
Peroxide
hypersensitive reaction and, in lettuce, 1067
production of, and *Egeria densa* leaf respiratory burst and electrolyte leakage, 1379
Petunia, pollen tubes of, monosaccharide transport in, 297
Pex5p, in Arabidopsis, 330
pH
barley root growth and, 957
Cl^- efflux and, in charophyte algae, 173
cytoplasmic, alkaloid synthesis and, in California poppy, 349
droughted barley leaf expansion and, abscisic acid and, 1507
photosystem II fluorescence quenching dependent on, in red alga, 103
after water stress reversal, in maize leaves, 701
Phaseolus vulgaris (*see* Bean)
Phenylalanine ammonia-lyase, in cherry fruit, 1102
Phospholipase D isoenzymes, in cabbage, 1102
Phosphoglucomutase gene, in poplar cambium, 1535
Phosphoribosyl-AMP cyclohydrolase, histidine biosynthetic gene encoding of, in Arabidopsis, 275
Phosphoribosyl-ATP pyrophosphohydrolase, histidine biosynthetic gene encoding of, in Arabidopsis, 275
Phosphothreonine residue, protection of plasma membrane H^+-ATPase by, in spinach, 551
Photolyase gene, in Arabidopsis, 1101
Photosynthetic acclimation
of barley leaves, 227
of ryegrass, 683
of wheat, nitrogen supply and, 573
Photosynthetic rate, barley leaf carbohydrates and, 1525
Photosystem II, light-harvesting chlorophyll *a*/*b* protein of, in spinach, acclimative degradation of, 827
Photosystem II fluorescence quenching, pH-dependent, in red alga, 103
Phytoalexin biosynthesis, in California poppy, cytoplasmic pH and, 349
Phytochrome
and gibberellin biosynthesis in lettuce seeds, 1517
nuclear gene expression and, in Arabidopsis, 803
Phytochrome A and B, cytochrome 1 synergism with, in Arabidopsis, 19, 27
Phytochrome C gene, in rice, 1535
Pine
dark-grown primary needles of, chlorophyll synthesis in, 1159
seedling gymnosperm of, $NADP^+$-isocitrate dehydrogenase in, 617
Pinus (*see* Pine)
Piperonylic acid, cinnamate 4-hydroxylase inhibition by, 209
Pisum sativum (*see* Pea)
PK3At, in Arabidopsis, as homolog of pea PsPK3 protein kinase, 712
Plasma membrane
actin associated with, in tobacco, 917
of red beet, intrinsic protein subgroups in, 315
Plasma membrane H^+-ATPase, phosphothreonine residue in, protection of, in spinach, 551
Plasmodesmata, in tobacco leaves, regulation of protein trafficking via, 373
Plastid, nuclear gene expression and, in Arabidopsis, 803
Plastid envelope membranes, biochemical machinery of, 715
Poa annua, ubiquinone reduction in, alternative oxidase stabilization of, 599
Pollen
of *Impatiens glandulifera*, cytoplasmic viscosity and desiccation tolerance in, 1253
Rho-GTPases specific for, in Arabidopsis, 407
of *Typha latifolia*, cytoplasmic viscosity and desiccation tolerance in, 1253
Pollen tubes
directional guidance of, on tobacco stigma, 733
of petunia, monosaccharide transport in, 297
Pollination, tomato fruit ornithine decarboxylase and, 323
Polypyrimidine tract-binding protein, Arabidopsis cDNA similarity to, 330
Poly(ADP)-ribose polymerase, in maize, 895
Poplar
cambium of, phosphoglucomutase gene in, 1535
chloroplasts of, glutathione and amino acid biosynthesis in, 471
ozone sensitivity in, 1243
xylem of
anionic peroxidases of, 125
cellulose synthase in, 1101
Poppy (*see* California poppy; Opium poppy)
Populus (*see* Poplar)
Potassium, barley root growth and, 957
Potato
germin-like protein in, 711
glucan endo-1,3-β-glucosidase in, 712
tetrapyrrole biosynthesis and, 330
tubers of
ADP-glucose pyrophosphorylase in, 265
dormancy of, ethylene in, 843
PR-10 protein gene, in *Lilium longiflorum*, 1535
Prenylcysteine α-carboxyl methyltransferase, in tobacco cells, 115
Proline dehydrogenase, in Arabidopsis, 1233
Proteasome inhibitors, tracheary element differentiation and, in zinnia mesophyll cell cultures, 419
Protein trafficking, regulation of in tobacco leaves via plasmodesmata, 373
Protoporphyrinogen IX oxidase, chloroplastic and mitochondrial, in tetrapyrrole biosynthesis, 330
Protoporphyrinogen oxidase inhibitors, tobacco cellular resistance to, 751
psbD light-responsive promoter, in wheat chloroplasts, circadian-regulated transcription of, 1079
Pumpkin, gibberellin biosynthesis in, 1411
Purple acid phosphatase, from *Spirodela oligorrhiza*, 1015
Pyrroline-5-carboxylase synthetase loci, in tomato, 661
Pyruvate dehydrogenase kinase, in Arabidopsis, 1533

R

Red algae, photosystem II fluorescence quenching in, pH and, 103
Red beet, plasma membrane of, intrinsic protein subgroups in, 315
Respiratory burst, in *Egeria densa* leaves, 1379
Rhodella violacea (*see* Red alga)
Rho-GTPases, pollen-specific, in Arabidopsis, 407
Ribosome-associated p40 protein
in chickpea, 330
in oilseed rape, 1536

Ribulose-1,5-bisphosphate carboxylase/oxygenase
carbamylation and 2-carboxyarabinitol 1-phosphate regulation of, in tobacco, 1463
CO_2 growth and, in rice leaves, 521
estimating excess investment in, in wheat leaves, 945
large subunit
in *Chloromonas*, 1534
in *Zantedeschia aethiopica*, 1534
Ribulose-1,5-bisphosphate carboxylase/oxygenase activase gene, in maize, 1535
Ribulose-5-phosphate epimerase, in spinach gene, 199
Rice
gluthathione S-transferase in, 329
glyoxysomal malate dehydrogenase in, 331
heat-shock protein genes in, 1101
leaves of
Rubisco expression in, CO_2 growth and, 521
zinc deficiency in, carbonic anhydrase activity and CO_2 transfer resistance in, 929
phytochrome C gene in, 1535
stem elongation in, 1105
Ripening
endo-1,4-β-glucanase gene and, in strawberry, 1307
of grape berries, cell wall changes during, 783
Root(s) (*see also* Taproot)
of Arabidopsis
development of, auxin movement and, 1369
growth of, 1139
of barley
effects of potassium and pH on growth of, 957
HKT1 regulation in, 651
of maize
ammonium generation in, 835
cytoskeleton of, aluminum and, 159
of wheat, *HKT1* regulation in, 651
Root cap, of pea, mitosis suppression in, 1223
Root nodules, of alfalfa, infected cells of, *nms-32/34* gene and, 330
Root-knot nematode, *LeMir* gene induced by, in tomato, 237
Rubisco (*see* Ribulose-1,5-bisphosphate carboxylase/oxygenase)
Rye (*see also* Winter rye)
Ryegrass, photosynthetic acclimation to elevated CO_2 in, 683

S

Salicylic acid biosynthesis, in tobacco, 565
Scherffelia dubia, chloroplasts of, frucose-1,6-bisphosphate aldolase gene in, 1533
Seedlings
of Arabidopsis, synergism between cytochrome 1 and phytochrome A and B in, 19, 27
of bread and durum wheat, zinc uptake, binding, and translocation in, 219
of mustard, thermotolerance in, salicylic acid and antioxidants in, 1455
of pine, $NADP^+$-isocitrate dehydrogenase in, 617
of tomato, gibberellin $^3\beta$-hydroxylase gene in, 1534
of transgenic tobacco, carrot late-embryonic abundant gene in, 1181
of *Vicia sativa*, methyl jasmonate effects on, 1481
Seeds
of Arabidopsis, low oil in, carbohydrate metabolism and, 91
of cattail, intracellular glasses and molecular mobility in, effects of temperature and water content on, 531
of cotton, fiberless mutation of, sucrose synthase expression and, 399
of lettuce, gibberellin biosynthesis in, phytochrome and, 1517
of muskmelon, callose and apoplastic semipermeability in, 83
of oat, assembly of vacuole-type H^+-ATPase in, 137
of pea, intracellular glasses and molecular mobility in, effects of temperature and water content on, 531
of soybean, mitochondrial leucine catabolic pathway in, 3-methylcrotonyl-coenzyme A carboxylase in, 1127
Senescence, of pea leaves, ascorbate-glutathione cycle in, 1327
Serine protease inhibitors, effect on oxidative burst and isoflavonoid phytoalexin accumulation, in soybean, 1487
Serine/threonine phosphatases, in *Catharanthus roseus*, 1533
Signal transduction, during gamete release, in *Pelvetia compressa*, 305
Sinapis alba (*see* Mustard)
Snapdragon, spikes of, gravitropic response of, lanthanum chloride and, 483
Solanum tuberosum (*see* Potato)
Soybean
cotyledons of, alternative oxidase expression in, 675
drought-induced, defensin gene in, 1536
nodule-specific glutamine synthetase gene in, 1533
oxidative burst and isoflavonoid phytoalexin accumulation in, serine protease inhibitors and, 1487
seeds of, mitochondrial leucine catabolic pathway in, 3-methylcrotonyl-coenzyme A carboxylase in, 1127
Spermine, tobacco mosaic virus infection resistance induced by, 1213
Spikes, of snapdragon, gravitropic response of, lanthanum chloride and, 483
Spinach
light-harvesting chlorophyll *a*/*b* protein in, acclimative degradation of, 827
plasma membrane H^+-ATPase in, phosphothreonine residue in, protection of, 551
ribulose-5-phosphate epimerase in, 199
Spinacia oleracea (*see* Spinach)
Spirodela oligorrhiza, glycosylphosphatidylinositol-anchored phosphatase in, 1015
Spodoptera littoralis larvae, trypsin proteinase inhibitor effects on, in tobacco and Arabidopsis, 997
Starch synthase, granule-bound, in wheat pericarp, 451
Starch-branching enzymes, in barley, 37
Starch-debranching enzymes, in pea embryos, 581
Stem elongation, in deepwater rice, 1105
Stigma, of tobacco, directional guidance of pollen tubes on, 733
Strawberry, endo-1,4-β-glucanase gene in, 1307
Sucrose, elongation growth dependent on, in Arabidopsis mutant, 793
Sucrose phosphate synthase, in tomato, chilling and, 149
Sucrose synthase
cotton seed fiberless mutation and, 399
in tomato, 1533
Sucrose transport, in tobacco leaves, 59
Sucrose/H^+ symporters, from carrot tap roots, 1473
Sulfur distribution, in oilseed rape leaves, 1337
Superoxide dismutase, in Arabidopsis, 637

T

Taproot
of alfalfa, β-amylase in, 1495
of carrot, sucrose/H^+ symporters from, 1473
Taro, oxalate exudation by, in response to aluminum, 861
Temperature (*see also* Chilling; Thermotolerance)
molecular mobility and intracellular glasses and, in seeds of pea and cattail, 531
Tetrapyrrole biosynthesis, in potato, 330
Thaumatin-like proteins, β-1,3-glucan binding to, 1431
Thermotolerance, in mustard seedlings, salicylic acid and antioxidants in, 1455
Thioredoxin peroxidase homolog, in winter rye, 711
Thlaspi caerulescens, zinc hyperaccumulation in, 875
Threonine dehydratase/deaminase gene, in Arabidopsis, 1534
Tobacco
α-*N*-acetylglucosaminidase gene in, 1534
acid-growth response and α-expansins in, 907
1-aminocyclopropane-1-carboxylate synthase gene in, 1534
cellular resistance to protoporphyrinogen oxidase inhibitors in, 751
diploid
atp2 gene family in, 331
mitochondrial ATPase β subunit coding in, 331
elicitin effects in, 1317
growth of, ratio of 24-methyl to 24-ethyl sterols and, 461
leaves of
auxin-induced growth of, 557
plasmodesmata in, regulation of protein trafficking via, 373
sucrose transport in, 59
mitochondria of, ATPase beta 3 isoform gene in, 711

nitrilase-like protein interaction with GCC box DNA-binding proteins in, 867
overexpression of α-linolenic acid in, 591
plasma membrane-associated actin in, 917
prenylcysteine α-carboxyl methyltransferase in, 115
salicylic acid biosynthesis intermediates in, 565
stigma of, directional guidance of pollen tubes on, 733
transgenic
opium poppy tyrosine/dihydroxyphenylalanine decarboxylase promoters in, 69
seedlings of, carrot late-embryonic abundant gene in, 1181
yeast *FRE* gene expression in, 51
trypsin proteinase inhibitor effects on *Spodoptera littoralis* larvae in, 997
zeaxanthin epoxidase gene in, 1021
Tobacco mosaic virus infection, spermine-induced resistance against, 1213
Tomato
benzothiadiazole-mediated resistance to *Fusarium oxysporum* in, 1203
chloroplasts of, nocturnal carbon export from, 1439
fruit of
ethylene biosynthesis in, feedback regulation of, 1295
ferredoxin isoprotein colocalization in, 439
ornithine decarboxylase in, 323
pyrroline-5-carboxylase synthetase loci in, 661
roots of, *LeMir* gene in, 237
seedlings of, gibberellin $^{3}\beta$-hydroxylase gene in, 1534
sucrose phosphate synthase and nitrate reductase activity in, chilling and, 149
sucrose synthase gene in, 1533
Tomcel8, cloning and sequencing of, 1535
Tracheary element differentiation, proteasome inhibitors and, in zinnia mesophyll cell cultures, 419
Transcriptional regulation, 1111
Triticum aestivum (*see* Wheat)
Triticum turgidum (*see* Durum wheat)
Tropaeolum majus (*see* Nasturtium)
Trypsin proteinase inhibitor, effects on *Spodoptera littoralis* larvae, in tobacco and Arabidopsis, 997
Tubers, of potato
ADP-glucose pyrophosphorylase in, 265
dormancy of, ethylene in, 843
Typha latifolia (*see* Cattail)

U

Ubiquinone, reduction of in *Poa annua*, alternative oxidase stabilization of, 599
Ubiquitin-carrier protein, in maize egg cells, 1101

V

Vacuole-type H^+-ATPase, assembly of, in oat seeds, 137
Vicia faba (*see* Broad bean)
Vicia sativa, seedlings of, methyl jasmonate effects on, 1481
Vigna unguiculata (*see* Cowpea)
Viscosity, cytoplasmic, desiccation tolerance and, in cowpea cotyledons and pollen of *Typha latifolia* and impatiens, 1253
Vitis vinifera (*see* Grape)

W

Water content, molecular mobility and intracellular glasses and, in seeds of pea and cattail, 531
Water hyacinth, metallothionein-like protein in, 1101
Wheat (*see also* Durum wheat)
anthers of, invertase cell wall gene in, 1535
cell membrane surface electrical potential in, 505
chloroplasts of, *psbD* light-responsive promoter in, circadian-regulated transcription of, 1079
glutenin subunit gene in, 1147
leaves of
excess Rubisco investment in, 945
resistance reactions in, chitosans and chitooligosaccharides in, 1353
MADS box genes in, 330
mineral toxicity in, calcium alleviation of, 513
pericarp of, granule-bound starch synthase isoform in, 451
photosynthetic acclimation and nitrogen supply in, 573
roots of, *HKT1* regulation in, 651
seedlings of, zinc uptake, binding, and translocation in, 219
Wheat germ lysate, FK506-binding proteins in, 1395
Winter rye, thioredoxin peroxidase homolog in, 711
Wound-induced allene oxide synthase transcripts, in flax leaves, aspirin/salicylic acid inhibition of, 1057

X

Xanthophylls, in photosynthetic acclimation, of barley leaves, 227
Xylem, of poplar
anionic peroxidases of, 125
cellulose synthase in, 1101
Xyloglucan:fucosyltransferase, in developing nasturtium fruit, 885

Y

Yeast
Arabidopsis endoplasmic reticulum Ca^{2+}-pumping ATPase expression in, 817
FRE gene in, in transgenic tobacco, 51
Yellow lupin, mitotic cyclins of, 330

Z

Zantedeschia aethiopica
glutathione peroxidase in, 1102
Rubisco large subunit gene in, 1534
Zea maize (*see* Maize)
Zeaxanthin epoxidase gene, in tobacco, 1021
Zinc
deficiency of, in rice leaves, carbonic anhydrase activity and CO_2 transfer resistance in, 929
hyperaccumulation of, in *Thlaspi caerulescens* root and leaf, 875
uptake, binding, and translocation of, in bread and durum wheat seedlings, 219
Zinnia, mesophyll cell cultures of, tracheary element differentiation in, proteasome inhibitors and, 419
Zinnia elegans (*see* Zinnia)
